

LR(0) Parsing

$E \rightarrow E + T$	$\rightarrow LR(0)$
$E \rightarrow T$	$\rightarrow SLR(1)$
$T \rightarrow T * F$	$\rightarrow CLR(1) / LR(1)$
$T \rightarrow F$	$\rightarrow LALR(1)$
$F \rightarrow (E)$	
$F \rightarrow id$	

Augmented Grammar $\rightarrow$ New starting variable that implies the whole starting grammar.

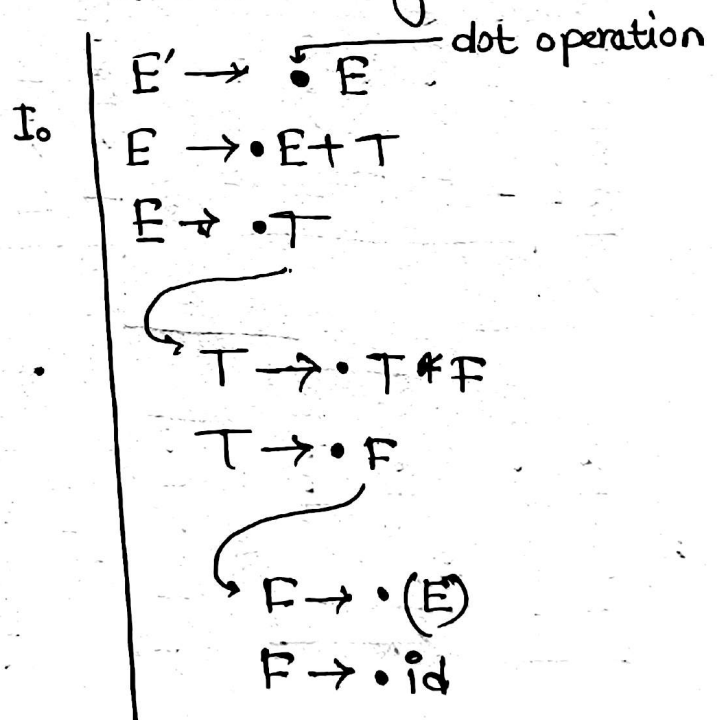

Step-1:

Augmented Grammar:

0. $E' \rightarrow E$
1. $E \rightarrow E + T$
2. $E \rightarrow T$
3. $T \rightarrow T * F$
4. $T \rightarrow F$
5. ~~$E \rightarrow (E)$~~ $F \rightarrow (E)$
6. $F \rightarrow id$

Step-2:

Transition Diagram:

Step-2: (Cont.)
